Jabalpur, India | +91 9111018491 | harshvardhanti12@gmail.com | [Portfolio](#)

SUMMARY

Backend-focused software engineer with hands-on experience in Java, Spring Boot, and RESTful API design, backed by a strong foundation in object-oriented design, data structures, and algorithms. Full software development life cycle exposure spanning requirement analysis, backend implementation, and quality validation.

EXPERIENCE

Application Developer Intern — Mastek Limited *Jan 2024 – Jun 2024*

- Delivered backend modules for enterprise web applications by designing object-oriented Java, JSP, and Servlet components across 4-5 application features, supporting core business workflows in production.
- Streamlined backend implementation by analyzing functional and technical requirements and re-architecting data flow and class design across 4-5 application features, reducing rework during development.
- Strengthened system reliability by implementing structured exception handling and input validation across core modules, reducing defects surfaced during SDLC testing phases.

Quality Assurance Engineer — App Wizards Technology *Jan 2026 – Feb 2026*

- Improved release stability by designing and executing functional, regression, and smoke test suites across multiple application modules ahead of production deployment.
- Identified and documented 15+ defects pre-release by applying systematic test case design, reducing post-release incident risk.
- Standardized QA execution workflows, improving handoff quality and consistency between QA and development teams.

PROJECTS

ZenJob — AI-Powered Job Application Tracker & Resume Matcher

React, FastAPI, Python, Firebase, Tesseract OCR, Scikit-learn

GitHub: [View Repository](#) | Live: [zenjob.space](#)

- Built and shipped an AI-powered resume-matching engine that applies OCR and NLP to automatically score and rank resumes against job descriptions.
- Designed a production-ready deployment with authentication, cloud storage, and export functionality, processing 200+ resumes during testing and demo use.
- Reduced manual resume-review effort by integrating Tesseract OCR with a Scikit-learn-based matching model for automated, explainable scoring.

CashFlow — Personal Finance Management System (Backend Developer)

Java, Spring Boot, REST APIs, PostgreSQL, JWT, OAuth2, Git

GitHub: [View Repository](#)

- Engineered a RESTful personal finance backend with a clean controller–service–repository architecture to track income, expenses, and financial records.
- Implemented JWT- and OAuth2-based authentication and authorization, securing user financial data across all API endpoints.
- Strengthened backend resilience by enforcing structured exception handling, input validation, and logging across 6-10 REST endpoints.

SKILLS

Programming Languages: Java, Python, C++, PL/SQL

Backend & APIs: Spring Boot, RESTful API Design, Object-Oriented Design, JWT, OAuth2

Databases: Oracle SQL, PostgreSQL, MySQL, Firebase

Testing & Quality: Manual Testing, Test Case Design, Defect Reporting, JUnit, Regression & Smoke Testing

Concepts: SDLC, STLC, Agile Methodology, Data Structures & Algorithms (DSA)

Tools: Git, Oracle EPM (Learning)

EDUCATION

Master of Engineering, Computer Science & Engineering

Shri Ram Institute of Technology, Jabalpur — Expected Graduation: 2026

Bachelor of Engineering, Computer Science & Engineering

Shri Ram Institute of Technology, Jabalpur — Completed: 2024

Relevant Coursework: Object-Oriented Programming, Database Management Systems, Software Engineering
